

MINUTE OF MEETING

COURSE EVALUATION-TEAM TEACHING

Date : 8 januari 2021
Time : 09.00-11.00 WIB
Course : Ecotourism

1. Subject Discussion

- updating materials for content enrichment
- diversification learning methods
- conformity of learning plan and implementation

2. Problem

Ecotourism

Update Materi:

recently new information about tourism development of village (4 A and 7 P) particularly to establish Pro-Climate Village, Ecotourisme Village, Geotourism, Culture tourism, etc in all over Indonesia to improve public welfare

Update Method:

To improve the competence, skill, and understanding, it is necessary to give skill and knowledge in tourism destination development through 4 A (attraction, accessibility, Amenity, and Ancillary) and 7 P (product, place, price, promotion, people, process, and physical evidence) based on individual project. Through this project student can contribute to its hometown in developing tourism

3. Folow up

Ecotourism-propose and implement new module as assigned:

update material of ecotourism by adding tourism development of village (4 A and 7 P) particularly to establish Pro-Climate Village, Ecotourisme Village, Geotourism, Culture tourism, etc in all over Indonesia to improve public welfare
implemented new method-Project based learning individually or groups with topic “ tourism destination development based on individual project”

MINUTE OF MEETING

COURSE EVALUATION-TEAM TEACHING

Date : 4 Januari 2021
Time : 13.00-15.00 WIB
Course : Coastal Area Management

1. Subject Discussion

- updating materials for content enrichment
- conformity of learning plan and implementation

2. Problem

Material Update:

Addition of lecture material that discusses the existence of a geopark program, especially in the Banyuwangi and Bondowoso areas. This geopark program is given to students as additional insight and information related to conservation efforts in geopark areas. In addition, there is additional material that discusses high conservation value (HCV) for corporation (Non conservation area) related to conservation efforts, especially in tropical areas--Day

Update Method:

The method that has been used so far is the case study method on tropical biological conservation issues related to threats to biodiversity in the world population or ecosystem level is prioritized in Biosphere Reserve conservation areas Blambangan. Tasks are done in groups of 2-3 people.

3. Solution

The solution applied for the biology conservation lecture is to invite students to do field practice in the Blambangan Biosphere Reserve for 1-3 days to conduct field observations on the implementation of biological conservation management

4. Follow up

During this covid pandemic, temporary lectures are held online so that students can do assignments in their respective areas and eliminate field practice.

Team teaching attended:

1. Hari Sulistiyowati (coordinator) 1.
2. Rendy Setiawan 2.
3. Arif Mohammad Siddiq 3.
